

HOUSE ATREIDES

AT START: Starting spice: 10 · 10 forces in Arrakeen and 10 in reserves. Start with 10 spice.

REVIVAL: 2 forces.

ADVANTAGES

You have limited Prescience.

BIDDING PRESCIENCE*: During the Bidding Phase you may look at each Treachery Card as it comes up for bid. You may keep notes about cards.

NEXUS PRESCIENCE*: You may look at the top card of the Nexus Deck.

BATTLE PRESCIENCE*: During battle (step 2.2) you may force your opponent to reveal 1 part of their Battle Plan early (Weapon, Defense, Dial + whether Mercenaries is being played, or Leader).

KWISATZ HADERACH*: Once you have lost 7 or more total forces in battles you gain the Kwiatz Haderach token that can be played alongside leaders in battles in one territory per turn.

The token adds +2 to leader strength, and the leader cannot be called traitor. The token can only be lost in a lazgun-shield explosion, after which it can be revived like a normal leader.

LETO'S TITHE*: During Spice Collection phase take 2 spice from the Spice Bank if you control one stronghold. Take 3 instead if you control at least two strongholds. You permanently lose this advantage once you gain the Kwisatz Haderach token.

ALLIANCE

Shared Prescience: Your ally may allow you to use Battle Prescience in their battles.

FATE

Arrakis Fiefdom: Play your fate card at any time before Ship & Move Phase to obtain the Carryall Tech Token, which you cannot lose. The token triggers when a spice mine sends troops to reserves. You may also spawn a 3 spice mine on any sand territory that doesn't have a Spice Blow marker.
